Dizziness

Fatigue

Headaches

Heavy Metal Toxicity

Hormonal Imbalances

Hyperactivity

Joint Discomfort

Muscle Pain

Parasites

Reoccurring Colds & Flus

Sleeplessness

Stress

Viruses

Vitamin & Mineral Deficiencies

I am a registered nurse, an occupational therapy assistant and work part time on the Neonatal Intensive Care Unit at Blank Children's Hospital in Des Moines, Iowa. My husband and I have three grown daughters whom are all enjoying new adventures in college.

I became certified to use the Computerized Electro-Dermal Screening (CEDS) from Star Tech Health in Orem, Utah.

I have received additional one-on-one training from an experienced CEDS practitioner who continues to have extensive success with this system. Based on the great experiences my family has had using CEDS over the past twenty years, I decided to pursue CEDS to help others in the same way we have been helped.

What is Computerized Electro-Dermal Screening?

The Computerized Electro-Dermal Screening (CEDS) measures the energetic conductivity and resistance along the body's energy meridian points. The CEDS will find remedies to help balance the body so your body can heal, balance and correct itself.

Computerized Electro-Dermal Screening is the product of over forty years of evolution in Biological-Energetic/Biofeedback testing. The technique is understood, accepted, and widely used in the most progressive institutions throughout the world. It is based on the Chinese medical theory that improper energy flow through the acupuncture meridians causes energy imbalances in the body. Doctors have identified the interrelationship between acupuncture point measurement and individual organs and tissues.

There are usually two to four clamps attached to your fingers which allows the computer to monitor the energy flow. It is non-invasive and pain free.

CEDS is used to balance your energy fields to aid your body in healing itself.

Do you know someone who...

- has been to multiple physicians and **still does not feel well?**
- has allergies and needs to be tested but **doesn't like needles?**
- wants to know if they have **heavy metals or toxins** in their system?
- has multiple **food sensitivities?**
- wants to know if they have **vitamin or mineral deficiencies?**
- wants to **do everything possible** to get and stay healthy?

Then please tell them about CEDS! I want to help!

What people are saying about CEDS:

"My cholesterol, triglycerides, and LDL were all measuring at high risk levels, along with other health concerns. I am so very fortunate to have experienced CEDS the last eight months. My doctor is very pleased that I am now able to maintain normal Lipid levels without medication and my overall health seems good. I attribute this success to eating healthier and having CEDS reevaluations regularly. MKA Earlham, IA

"CEDS is awesome! It has truly saved my life!" *KM*

"Using CEDS has helped me stay healthy or get over my virus/bacterial infections quicker. It has also helped my attitude and allowed me to deal with my stress better." *CL*

"I am so glad our chiropractor recommended Lynette to us, we love Lynette! My one son, with IBS-type symptoms, is not sick all the time and is enjoying a lot of activities. My older son's migraine condition is stabilizing and my GI issues are getting under control. It is still a work in progress, but CEDS has given us hope. It has been worth it!"

CB

My mom, sister, best friend and I have gone to Energy Health since Lynette started. We began going because of various health problems that no doctor could seem to solve. Now we go because Lynette helps us with balance, breathing, coughing, aching, viruses, and even for our moods. It is wonderful and so is Lynette. *AD*
